

## Children Cry for Fletcher's

## CASTORIA

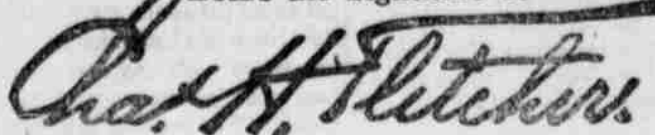

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

## What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

## Institutional Treatment of Tuberculosis

means that the patient is given constant attention; that the regime which is found to be best adapted to the case is rightly adhered to; that a resident physician is at hand all of the time, studying the case and adapting the treatment to it; that nursing service is the best. All of these things mean improvement, greater comfort and possible recovery. Hazelwood is operated without profit by the Louisville Anti-Tuberculosis Association. Rates \$12.50 a week. Write for detailed information.

Very Brave.

Percy Williams—"You need not fear  
tramps or rough men when you are  
with me, darling. I'm a champion  
runner, and if we were attacked I'd  
run off and bring help to you in no  
time."

Hard to Reach.

Some men's meanness consists of  
their stinginess with their means.  
When they give up their meanness  
they will be willing to give up more  
of their means. Such men, however,  
are pretty hard to convert.

## CUSTOMS OF THE COMMONS

Bills in Both British Houses of Par-  
liament That Tend to Keep the  
Memory Green.

There is no other building in the United Kingdom where the daily customs observed are so full of interest as in the house of commons, says a writer in London Tit-Bits. Many people who sit in the gallery fail to see in the various formal links which bind us to events of centuries ago. But if the visitor is willing to find out the significance of what he sees, he will enter into a world of inexhaustible romance.

If, for instance, he is present on the first day of a session, he will notice that, before the clerk at the table reads out the business printed on the order paper, he calls out "outlawry bill," which is thereupon considered to have been read a first time, and the house passes on to its appropriate business.

It is the symbol which marks the victory of parliament long years ago in its claim to consider whatever business it likes without interference by the crown. So, in the first day of every session, before parliament proceeds to consider the business for which it has been called together, it turns aside to give a first reading to the outlawry bill.

The same curious rite takes place in the house of lords at the beginning of each session, but in this case the bill which is read a first time is called "select vestries," and it is considered immediately after the king's speech has been read. No one knows what the outlawry bill or the select vestries bill is, but they stand for the supremacy of parliament.

## Sloan's Liniment For Rheumatism

The torture of rheumatism, the pains and aches that make life unbearable are relieved by Sloan's Liniment, a clean clear liquid that is easy to apply and more effective than musky plaster or ointments because it penetrates quickly without rubbing. For the many pains and aches following exposure, strains, sprains and muscle soreness, Sloan's Liniment is promptly effective. Always have a bottle handy for gout, lumbago, toothache, backache, stiff neck and all external pains. At Drugists, 25c.—Advertisement.

## GOOD FEED BOX FOR HORSES

Device Arranged to Fit on Wagon for Feeding Work Animals—Prevents Waste of Grain.

A teamster who is obliged to feed his horses during the noon hour at the wagon has devised a feed box to take the place of a nose bag, writes Vinton V. Dettler of Manhattan, Kan., in Popular Mechanics. When the box

Wagon Feed Box.

is hooked over the top edge of the wagon box the height is just right for the horses. The box prevents waste of grain and provides a better way to feed the horses than in the wagon box.

## FATTENING RATION IN IOWA

By Reducing Corn and Increasing Silage Rapid Gains Were Made With Less Expense.

Silage has cheapened the fattening ration for steers in Iowa. One lot, receiving each per day 17 pounds shelled corn, 29 pounds silage, 2 pounds oil meal and 1½ pounds alfalfa, made gains at a cost of \$9.57 while another lot, receiving 8½ pounds corn, 51 pounds silage, 2 pounds oil meal and 1½ pounds alfalfa, made gains at a cost of \$7.07. The first lot averaged 2.94 pounds gain per day while the second lot averaged 3.04 pounds. Reducing the corn and increasing the ensilage increased the gains and cut down the cost of making gains.—North Dakota Agricultural College.

## PREVENT WASTE OF MANURES

Careful Attention Should Be Given to Barn Yards and Other Places Occupied by Cattle.

Careful attention should be given to the prevention of waste of manure in the barn lot and other yards occupied by the cattle.

With the high price of potash now prevailing, it is also important that all wood ashes be saved and applied.

## CHANGE TYPE OF LIVE STOCK

Except in Improvement of Dairy Herd It Is Tedious Process—Strive for Uniformity.

If one wishes to change the type of his live stock he will find various roads open to him and he may be confused as to which to take. First and most common, a sire of the desired type may be bought for the herd and year after year improvements may go on in this manner. But it is at best a tedious process and, except in the improvement of the dairy herd, it had better be avoided. Life at best is not long enough to observe very marked results by this method.

A much better method in the case of beef cattle, sheep and swine, if many are kept, is to provide a few females of the desired type and also a male for them, the progeny of which shall be kept while the old type are gradually disposed of. It is surprising how quickly the type of the herd will be changed.

Then again it is possible to sell off the entire lot of cattle or other live stock on the farm and to procure those of the desired type at one time. This is the ideal method if it is financially practicable.

The one great thing to be desired in a herd is uniform excellence and the easiest and least expensive method of bringing this about is the one to be adopted.

## RATION FOR GROWING COLTS

Two Parts Oats and One Part Bran Makes Suitable Feed—Add Little Corn in Winter.

Two parts of oats (preferably crushed) and one part of bran make a very suitable feed for growing colts. In cold weather a little corn may be added not to exceed 25 per cent of the ration. If clover or alfalfa is used as half of the roughage ration, no oil meal will be needed, but if the roughage consists of wild hay or corn stover, about 8 per cent of oil meal should be added to the grain ration. Where oats is high in price and barley is plentiful, a ration of crushed barley 60 per cent, bran 30 per cent, and oil meal 10 per cent should give good results.

There is a little danger of overfeeding a colt if it is properly exercised. A colt should receive at least one pound daily for each 100 pounds of live weight, and if out in the cold a little more may be used to advantage.

Growth can be made more rapidly and cheaply during the first year than at any other time, and feed should not be spared at this time.

One way to relieve habitual constipation is to take regularly a mild laxative. Doan's Regulax are recommended for this purpose. 25c a box at all drug stores.—Advertisement.

## Optimistic Thought.

A hundred years of fretting will not pay a single cent of debt.

## HELP FEED YOURSELF

## Make Home Gardens and Back Yards Productive

Make Every Square Yard Of Fertile, Sunny Soil Produce Food For Your Family.

If You Can't Raise All Your Own Vegetables, At Least Raise Some.

Make your ground work for you and the Nation. Idle ground is waste; this is no time for waste or idleness.

All idle ground utilized in the production of vegetables means more food for those who have no ground at all.

Raise Some Vegetables For Your Family No Matter How Small A Piece Ground You Have

## Somebody Has to Raise Everything You Eat—Do Your Share

Keep Your Soil Working All Season.

Save All Surplus Fruits and Vegetable.

1. Keep your garden working all season. Hasten early crops by starting seed in boxes in the house, in hotbeds and cold frames if the weather prevents outdoor planting.

If your garden at any time produces more than you can use immediately, do not allow the surplus to spoil.

2. Get your ground ready for planting as soon as the soil is dry enough to work.

Can surplus beans, peas, corn, tomatoes, beets, spinach, pumpkin, and squash for winter use.

3. Plant for early crops as soon as the weather permits. Make successive plantings of lettuce, radishes, beans, and other short-season crops.

Can or preserve apples, peaches, pears, cherries, quinces, berries, and other cultivated and wild fruits.

4. Start new crops between the rows of plants that are soon to be removed.

Every can of vegetables or fruit and every jar of preserved food means that you have saved food materials that would have otherwise been wasted.

5. As fast as the ground is cleared of one crop start a new crop.

Can or store root crops, cabbage, and other vegetables properly so that they will keep well and supply you with food when the garden ceases to produce.

6. See that your garden toward fall is full of potatoes, beets, turnips, cabbage, and other staple foods that can be stored for the winter.

Learn How To Grow And Can Vegetables.

## Your Children, Too, Can Help.

Boys and girls can help to make the soil in your gardens, back yards, and vacant lots produce food for the family. Last year they raised in the gardens and helped to can more than 4,000,000 packages of valuable food.

The U. S. Department of Agriculture or your State agricultural college or county agent will give you explicit directions for raising vegetables, and will tell you simple methods for canning vegetables and fruit at home with ordinary home utensils.
